List of Companies Informing the Material Flow diagrams: Reintegrating wood from CRD sector – Sources to products and Incorporating recycled content (Canada.ca)

Company	Province	Description
Backroads Reclamation	AB	Leading an integrated facility project for the recovery and processing of CRD wood. Reclaims wood, including old-growth lumber, from buildings and transforms it into furniture, interior decor, wood art, and sold as is for other purposes
Urban Timber Co	AB	Reclaims lumber from barns and other sources to manufacture doors and furniture, as well as reclaim flooring from historical buildings for second use.
Rural Creative	AB	Repurposes reclaimed wood that is sourced locally (including pallets) and upcycles them into custom artwork products. Sawdust from cutting is also saved for local farmers for use in barns.
Lonestar Lumber	AB	Repairs damaged pallets to be recirculated and those that cannot be repaired are stripped of any salvageable boards and/or sent to the grinder for chipping for other uses such as composting and biofuels.
Taitlin Studio	AB	Builds custom, handmade furniture (e.g. dining tables) from reclaimed timbers.
Wall Theory	AB	An online store selling reclaimed barn wood planks sourced from centuries-old barns, used as rustic barn wood walls.
Vema Deconstruction	BC	Performs deconstruction to salvage wood, including old growth for upcycling and reuse. The wood is sold as is to be reused as building materials and/or furniture.
Urban Jacks	BC	- Our reclaimed wood sources include construction, renovation, and demolition (CRD) waste, exhibitions, and film and TV productions. - We are actively actively advancing toward structural-grade certification to expand our market, with testing and certification currently underway. - In addition to producing raw lumber, our material is used in the production of finished products such as acoustic and architectural panels, in collaboration with sustainability-focused builders and designers. - Our process tracks and diverts CRD wood to create measurable GHG reductions and supports LEED certification and Environmental, Social and Governance (ESG) reporting. Urbanjacks manufactures finger-jointed lumber from reclaimed wood sourced from construction, renovation, and demolition (CRD) sites, as well as exhibitions, deconstructed film and TV production sets. While current applications focus on non-structural uses such as set design, outdoor structures, and restoration, our lumber is also used in the production of acoustic and architectural panels. We are actively advancing toward structural-grade certification to expand our market. Our process keeps valuable wood in circulation (e.g. diverts from landfill), supports GHG reduction, and contributes to LEED compliance, Environmental, Social and Governance (ESG) reporting and circular economy goals. More information is available at www.urbanjacks.ca.
Blue Planet Recycling	BC	Fixes and refurbishes 95% of wooden pallets for reuse, 5% that are unable to be reused are made into woodchips for use in particle board, paper, and livestock bedding.
I Used to be a Pallet	BC	Upcycles wooden pallets and reclaimed wood from CRD activities into new products including furniture, art, commercial items, home and garden products, and various novelties (e.g. seasonal decor items, little free libraries) based on artistic creativity and customer specifications

		(https://www.ctvnews.ca/vancouver/vancouver-island/article/91-year-old-father-and-son-reconnect-by-turning-replicas-of-homes-into-little-libraries/) . The end cuts are also saved to heat homes, and sawdust reutilized in gardens. This has resulted in the creation of over 700 specialized products, successfully diverted 12-15 tons of wood from landfill, and recently led to them being a Synergy Foundation's Ecostar- Waste to Resource 2024 award winner.
Structurecraft	BC	Works with reclaimed wood to manufacture sawn timber.
Salvaged Vancouver	BC	Barn boards from old barns across the country are carefully selected and processed to ensure quality and durability for use as accent walls, furniture construction, or DIY projects
Hall it Up – Recycled Floors	BC	Reclaimed floors of maple, fir, oak and occasional exotic wood are made into moldings, fittings and fixtures, and into unique products for home owners, businesses and contractors – e.g. provides historic look to brand new Victoria character homes. Other sources of reclaimed wood has included bowling alley lanes (made into a bar). The company sources reclaimed flooring for use in coffee stores, restaurants, and environmentally friendly flooring and decorative elements in a commercial store.
Syd's Demo & Salvage	BC	Building salvage company that recycles houses into useful building supplies, and stocks a selection of salvaged materials. Source materials include old growth lumber and fir floors, doors and windows, fixtures, to commercial kitchen equipment.
Rewood	BC	Volunteer-led effort to give old wood a second life by salvaging lumber from building sites before it is transferred to the landfill. Materials are then transformed to strong, durable wooden infrastructure products for use in community gardens, small urban farms, nurseries and related social enterprises in the region.
First Growth Reclaimed Design	BC	Works with old-growth Douglas Fir salvaged from local buildings, destined to be demolished, discarded or deserted, and transform these materials into customizable works of art (ornaments).
A Light Studio	BC	Reuse of salvaged wood to manufacture wooden light fixtures.
Island Woodwork	BC	Designed Cribbage boards made from 100% recycled wood.
Maple Ridge New and Used	BC	Recycle unwanted building materials e.g. doors, windows, lighting, cabinets from renovation /demolished / owners replacing materials. Provides salvage crew for in-house removal for larger projects and drop-off for smaller items. These reuse items (doors, windows, cabinetry, plumbing, lighting, hardware) are sold on site.
The BarnHouse Company	BC	Makes barn doors, fireplace mantles, feature walls, ceiling beams and furniture from reclaimed barn wood.
The Den Authentic Barnwood	MB	Sourcing and reclaiming antique wood (e.g. from prairie barns, grain elevators) for reuse, sold as is for feature walls and DIY projects.
Halifax C&D Recycling Goodwood	NS	Repurposes clean reclaimed wood to be manufactured into animal bedding or for use as biomass.
Creative Urban Timber	NS	Manufactures furniture from local reclaimed hardwood. (e.g. hand-hewn salvaged beams as a fireplace mantel or shelving display).

The descriptions in green reflect information verified by the companies, descriptions in black are based on publicly available information.

Timberhart Woodworks	NS	Reclaims vintage and heritage timber frames from historical homes, barns, and churches to be reused as building materials and sold as is.
Onslow Historic Lumber	NS	Salvages vintage building materials including wood for reuse, and manufactures furniture and home accents from time-worn wood salvaged from period buildings
City Pallets	ON	Repairs damaged pallets to be recirculated.
Timbercraft	ON	Performs barn demolition and salvages the wood including old growth timber for reuse. Reclaimed wood is manufactured into custom furniture, wall cladding, mantles, flooring, and sold as is for other purposes.
HD Threshing	ON	Manufactures custom wood furniture (e.g. desks, vanities, islands, shelving, beds) from reclaimed wood.
Ouroboros Deconstruction	ON	- Performs efficient deconstruction so that the value of extracted materials including wood may be recovered and their utility extended. - Sells reclaimed wood materials as is for reuse as building materials and other purposes. - Incorporates reclaimed materials in new construction projects and renovations. - Develops innovative products to incorporate reclaimed wood, such as nail-laminated timber (NLT) panels and kits.
The WoodSource	ON	Process reclaimed wood sourced from various sources (e.g. deconstruction activities, retrieved from renovations or land developments, sourced from other business partners) to be sold as is, or as cladding, beams, flooring and other building materials. The company's showroom and office building is also constructed using reclaimed wood.
Revival Flooring	ON	Sources reclaimed wood (e.g. floorboards, wall beams) from barns and buildings and processes the wood for use as antique reclaimed wood flooring.
Old Wood Salvage	ON	Sources reclaimed wood salvaged from old barns, warehouses, and factories to manufacture custom furniture and flooring.
Re4m Design and Fabrication Inc.	ON	Collects reclaimed wood to design and build custom furnishings, fixtures, small wood products, and display materials.
Forever Interiors	ON	Designs, builds, and sells furniture and home accessories made from reclaimed wood and other materials.
Lubo Design	ON	Creates unique furniture and art from reclaimed wood.
Timeless Material Co and Kieswetterdemo	ON	Performs sustainable demolition to salvage building materials including wood to be manufactured into shiplap, cladding, faux beams, furniture, flooring, mantels, and architectural components.
Barnboardstore	ON	Manufactures furniture and interior finishes (e.g. hollow beams and mantels) for homes and businesses from reclaimed barn boards and beams.
Junk Whisperer	ON	Upcycles reclaimed wood from century old homes and barns into furniture and wooden items for homes and businesses (e.g. mantels, art, small wood items, restaurant tables and bar tops)
Tomlinsongroup	ON	Recycles, and recovers CRD waste material. Reclaimed wood is processed to other uses such as mulch for landscaping and animal bedding as well as conversion to biomass or fuel sources.

The descriptions in green reflect information verified by the companies, descriptions in black are based on publicly available information.

Logsend	ON	Reclaimed barnboard and beams are fully upcycled to wall paneling, backsplashes, table tops, garden arbours and accents.
The Woodshed Lumber	ON	Processes and sells reclaimed barn boards, and floors to be reuse for other purpose.
Brothers Dressler	ON	Furniture (e.g. table, benches, lighting) are made salvaged wood from defunct factories and demolitions, among other sources. (newly identified)
Northern Wide Plank	ON	Manufactures flooring which are FSC certified from reclaimed wood sourced from old barns and buildings.
Danzer Canada	ON	A subsidiary of the international hardwood company Danzer, for refurbishing old wooden structures and valuable unused beams for a beautiful second use
Century Wood Products	ON	Manufactures flooring from reclaimed wood obtained from dismantled barns and demolished factories and warehouses. Reclaimed barn beams are also available for sale to manufacture for example stair treads and table tops. Reclaimed exterior barn siding are also sold as a wall and ceiling finish.
Timberware Custom Cabinets	ON	Manufactures custom cabinets and furniture from sustainably-sourced wood (e.g. bench created from reclaimed hand hewn beam).
TRY recycling	ON	Accepts CRD debris and wood products to turn them into reusable materials.
Biomass Recycle	ON/QC	Collects waste wood and lumber from CRD sites and projects, manufacturers, recycling plants, waste transfer and sorting stations and landfill sites, and forwards them to processors for conversion to energy, wood pellets, horticultural mulch, particleboard or compost.
Robias Wood	PE	Manufactures furniture (e.g. stools, side tables) from reclaimed wood.
Reclaimed PEI	PE	Manufactures furniture from reclaimed barnboards.
Birdmouse	PE	Creates art, furniture, and feature walls for homes and businesses from reclaimed wood (e.g. recovered barnwood and household furniture).
Veser Antique Woods	QC	Manufactures beams, interior and exterior finishes (e.g. wood accent wall and siding), flooring, customized woodwork and furniture for homes and businesses.
Mr. Barn Wood	QC	Manufactures furniture and interior finishes (e.g. accent wall and stairs) for homes and businesses from reclaimed barn wood.
Tafisa: Rewood	QC	Processes post-consumer CRD wood materials into recycled wood fibres, which is then manufactured into particleboards, decorative panels/MDF for use as kitchen cabinets and other purposes.
MSL	QC	MSL Fibre manufactures wood fibre panels from post-consumer and post-industrial wood waste for the construction industry. Our panels are divided into three main ranges: soundproofing, thermal insulation and roofing. MSL Fibre recycles nearly 30,000 tonnes of CRD wood per year.
Timber Wood Innovations	SK	Manufactures nail-laminated timber from reclaimed material for use in variety of building applications (floor, roof, wall panels, beams and lintels). Retailers reclaimed lumber salvaged from grain elevators and other wood structures as is and repurposed as feature walls, sidings, and interior décor.

The descriptions in green reflect information verified by the companies, descriptions in black are based on publicly available information.

Last Mountain Timber	SK	Manufactures interior finishes (stair threads, railing, box beams), cladding (exterior/interior), timber frames, furniture, countertops and flooring from reclaimed wood including old growth timbers sourced from grain elevators and warehouses.
Restore - Habitat for Humanity	Canada wide	While Habitat Restores are affiliates, with varied practices and materials received or stocked, multiple locations of Habitat ReStore in Canada accept and retail reclaimed building materials including used wooden doors, cabinets, furniture as well as surplus (unused pre-consumer) flooring and other building materials (e.g. 2X4, offcuts). There are also some Restores that offer salvage or partial deconstruction services – e.g. dismantle and remove major household items from home or office at no charge, for donation to ReStore. Through this activity, items that can be recovered and resold include: cabinetry, fixtures, appliances, lighting, windows, doors, flooring, bricks, and more.
Companies that have closed		
Heritage Lumber	BC	Reclaims wood including old growth are remanufactured into building materials (cladding), flooring, interior finishes, feature walls, ceilings and furniture.
Prairie Barnwood	MB	Transform reclaimed wood into handcrafted furniture. (<i>*company indicates that they are stepping away from building furniture</i>)
Provincer Woodworks & Manufacturing Co	NB	Uses reclaimed wood to manufacture furniture (tables, cupboards) (<i>*google search indicates company has closed</i>)
Atmosphere & Bois	ON	Manufactures custom reclaimed furniture and retails reclaimed wood for use as is. (<i>*Closed in Canada</i>)
Canadian Salvaged Timber	ON	Manufactures furniture and flooring from reclaimed lumber. (<i>*google search indicates company has closed, company's website is functional</i>)
Companies involved in Proof of Concept work (not wide-spread commercial application)		
Materials Testing Facility - Fast + Epp Architect	BC	Building a facility from recycled materials from a recently-demolished warehouse. Glulam purlins, heavy timber trusses and tongue and groove decking (which might have been landfilled) were used for conventional roof and floor beams, as well as laid flat and to make a thick solid wood suspended floor, created two trusses through combining the best members from four existing ones, and added V-columns to reduce the span.
Shor House by Measured Architect	BC	Demonstrated careful deconstruction of wooden buildings, then refinishing and recombination of their parts into considered assemblies extends the life-cycle of material otherwise destined for landfill. "This is the new leading edge of design in wood."
LaneFab design build	BC	Reclaimed wood used as beams and trusses in new homes
Guitar makers	AB , QC	Proof of concept Calgary man creates one-of-a-kind guitars from reclaimed wood CBC News and Montreal man turns reclaimed wood from barns and buildings into custom guitars Montreal Gazette
Canadian Architects and Designers using reclaimed wood		

The descriptions in green reflect information verified by the companies, descriptions in black are based on publicly available information.

Checkwitch Poiron. Architect	BC	Structural elements of a school built with reclaimed wood provided by Heritage Lumber
Michael Green Architecture	BC	The use of reclaimed wood from a previous aircraft hanger at the Ottawa airport
Ravi Handa Architect	QC	Reclaimed materials found during demolition work was preserved and used as decoration a Montreal wine bar. (wood and metal collected used as art/interior finishes).
Jean de Lessard - Creative Designers	QC	Designed Japanese restaurant with a tavern-style interior constructed from recycled timber sourced from local barns
CRD wood for bioenergy <i>*if people are aware of companies using CRD wood for bioenergy, please let us know.</i>		
Gildale Farms	ON	Manufactures commercial grade fuel pellets from reclaimed clean chipped wood pallets.
